ITS SOLAR: Low Pressure system

After lots of development work and testing ITS is proud to launch our 100L low pressure solar water heater. This complete plug-and-play unit is the most efficient unit in the fleet because the water is directly heated in the tubes.

There are lots of similar looking low pressure systems on the market but we have also seen so many failures on these systems. For this reason we decided to spend a bit more time on the drawing board and make sure we manufacture a unit that will be durable. The units come with a sacrificial anode (something that many other solar companies have overlooked). Please visit our website for all the technical specs on this system:

<http://www.its-solar.com/its-low-cost-low-pressure-systems/>

This system is well suited to low cost developments and offers excellent solar conversion efficiency at a fraction of the cost of conventional solar water heaters.

WHAT DOES THE LOW PRESSURE SYSTEM INCLUDE

- Uses 10 evacuated tubes directly into low pressure geyser.
- Geyser pressure controlled with Marley Latco valve.
- Flat roof frame included.
- 5 year guarantee.
- 1kW electrical backup element
- Sacrificial anode included.
- Excellent pricing and Excellent Thermal Performance.

ITS SOLAR THERMAL SYSTEMS

We are a professional manufacturer and international supplier of solar thermal systems based in Cape Town, South Africa. Our aim is to provide you, our valued customer, with a complete system solution consisting of the best in current technology. In order to do this we are actively keeping up to date with the latest technological developments around the globe.

ITS Solar thermal systems set the standard in water heating technologies.

With an ITS System in place you can rest assured, as it will always provide you with hot water.

ITS Solar systems are cost saving, reliable, adaptable and function equally well during the winter and summer months. It is pollution free using renewable energy from the sun. ITS Solar systems boasts sleek and attractive designs which could add value to your property.
